SUMMARY

Detail-oriented Computer Science undergraduate with a passion for software and mobile application development. Proficient in Java, JavaScript, Android Studio, and SQL, with hands-on experience delivering academic and personal projects. Seeking to leverage technical expertise in an entry-level software engineering role.

EDUCATION

Bachelor of Science in Computer Science 4.2/5

Imam Abdulrahman Bin Faisal University 🌐

08/2021 – 08/2026

Dammam,

Relevant Coursework:

Data Structures, Algorithms, Database Systems, Object-Oriented Programming, Software Engineering, Web Development

Saudi Arabia

PROJECTS

Athlium – Gym Management & Fitness Platform

React 19, Node.js, Express.js, JWT, RESTful API, Cloudflare R2

- Built a full-stack gym platform with role-based dashboards using React 19, Vite, and Node.js RESTful API.
- Implemented secure JWT auth with 2FA, session handling, AI workout planning, and Cloudflare R2 media storage.

LostHub – Campus Lost & Found Mobile App 🌐

Android Studio, Java, XML, Gradle

- Developed a native Android mobile application to streamline reporting and reclaiming lost and found items across university campus communities.
- Designed intuitive XML user interfaces and integrated responsive search and filtering systems for fast item discovery.
- Implemented secure posting workflows with detailed descriptions, location tags, and communication channels for students to coordinate returns.
- Managed full app lifecycle from architecture planning to testing and deployment on physical Android devices and emulators.

PROFESSIONAL EXPERIENCE

Oracle Database & Application Developer Intern

Qatif Municipality – IT Department

06/2026 – 08/2026

Qatif, Saudi Arabia

- Engineered an end-to-end stockpile and inventory management system using Oracle Database 10g, PL/SQL, and Oracle Developer Suite.
- Authored optimized DDL/DML scripts, relational schemas, stored procedures, packages, and database triggers via Quest Toad and iSQL*Plus.
- Built interactive client forms (.fmb) with role-based navigation menus (.mmv) and client-side validation triggers to streamline operational workflows.
- Designed automated dynamic reporting suites using Oracle Reports (.rdf) integrated with OC4J servlet engines to stream real-time PDF documents.

SKILLS

Programming Languages

Java, JavaScript, SQL

Web & Frameworks

HTML5, CSS3, React, Node.js

UI/UX & Design Tools

Figma, Android Studio, Git
